Declaration of Original and Sole Authorship

I, Jeremie Gillet, declare that this thesis entitled *LaTeX Thesis Template* and the data presented in it are original and my own work.

I confirm that:

- No part of this work has previously been submitted for a degree at this or any other university.
- References to the work of others have been clearly acknowledged. Quotations from the work of others have been clearly indicated, and attributed to them.
- In cases where others have contributed to part of this work, such contribution has been clearly acknowledged and distinguished from my own work.
- None of this work has been previously published elsewhere, with the exception of the following: (provide list of publications or presentations, or delete this part). (If the work of any co-authors appears in this thesis, authorization such as a release or signed waiver from all affected co-authors must be obtained prior to publishing the thesis. If so, attach copies of this authorization to your initial and final submitted versions, as a separate document for retention by the Graduate School, and indicate on this page that such authorization has been obtained).

Date: March 2018

Signature: **You may include here an image with a scan of your signature.**

Abstract

The abstract should fit within a page.

Acknowledgments

Please refer to `https://groups.oist.jp/grad/academic-program-policies` for specifications.

List of Abbreviations

Please refer to `https://groups.oist.jp/grad/academic-program-policies` for specifications.

Here is an example.

PPT	positive partial transpose
SRPT	Schrödinger-Robertson partial transpose

Glossary

Please refer to `https://groups.oist.jp/grad/academic-program-policies` for specifications.

Here is an example:

Dipole Blockade	Phenomenon in which the simultaneous excitation of two atoms is inhibited by their dipolar interaction.
Cavity Induced Transparency	Phenomenon in which a cavity containing two atoms excited with light at a frequency halfway between the atomic frequencies contains the number of photons an empty cavity would contain.

Nomenclature

Please refer to `https://groups.oist.jp/grad/academic-program-policies` for specifications.

Here is an example:

c	Speed of light ($2.997\ 924\ 58 \times 10^{8}$ ms^{-1})
$\hbar$	Planck constant ($1.054\ 572\ 66 \times 10^{-34}$ Js)
k_B	Boltzmann constant ($1.380\ 658 \times 10^{-23}$ JK^{-1})
Z_0	Impedance of free space (376.730 313 461 Ω)
μ_0	Permeability of free-space ($4\pi \times 10^{-7}$ Hm^{-1})

If desired, an optional and short dedication may be included here.

Introduction

This is the introduction. You might want to leave it unnumbered, as it is now. If you want to number it, treat it like any other chapter.

Chapter 1

Guidelines on the preparation of theses

Please refer to `https://groups.oist.jp/grad/academic-program-policies` for specifications.

Many of the formatting requirements such as page size, fonts, etc are built-in into this template. Do not modify them.

For the bibliography, we recommend using BibTeX or BibLaTeX and through the file `Preamble/Thesis_bibliography.bib`. Citing one reference can be done like so: [3] and multiple references in one go like so [1, 2, 4].

Chapter 2

How to use the templates

This is a practical guide into how to use this template, by explaining the role of the different folders, and an option of `\documentclass{oist_thesis}`, which accepts either `temporary` or `final`.

2.1 Folders

The main folder contains three folders detailed here:

- **Images.** This folder should contain all the images that you will use in your thesis. It can contain subfolders, for example one for each chapter. To include an image from the main text, use something like `\includegraphics{subfolder/image.jpg}` without worrying about the `Images` path.

- **MainText.** This folder contains a series of LaTeX files that form the main text: introduction, chapters, conclusion, appendices and published articles. The introduction and conclusion as they are now are not numbered, which creates a few difficulties with the headers of the thesis. Those are solved by including the commands `\unnumberedchapter{}` and `\numberedchapter` before including the files in `Thesis.tex`. If you want the introduction and conclusion to be numbered, include them as regular chapters.

- **Preamble.** This folder contains a series of LaTeX files with the pages that will appear before the main text. Please write (or copy and paste) your own text in

those files and delete the dummy text when appropriate. The files are:

- `abbreviations.tex` — List of abbreviations. If the list goes over one page, create another table.
- `abstract.tex` — Abstract. Follow directions in the file.
- `acknowledgments.tex` — Acknowledgments. Follow directions in the file.
- `declaration.tex` — Declaration of Original and Sole Authorship. Only modify the last item. This page needs to be signed once printed.
- `dedication.tex` — Dedication (optional). Should only be a very few lines.
- `glossary.tex` — Glossary (optional). If the list goes over one page, create another table.
- `nomenclature.tex` — Nomenclature (optional). If the list goes over one page, create another table.
- `physics_bibstyle.bst` — Bibliography style file modified by Jeremie Gillet in 2011 to suit his thesis. Might be suitable for physics. If you want to use another custom bibliography style, include the file in this folder.
- `Thesis_bibliography.bib` — BibTeX file containing your bibliography.
- `Thesis_publications.bib` — BibTeX file containing the list of your own publications (only for thesis by publication).

2.2 Thesis.tex

This is the main file, the only one that needs to be compiled to build the thesis. Compile once with LaTeX, once with BibTeX and finally twice with LaTeX to get all the references right. At the top of this file, you can see `\documentclass[temporary]{oist_thesis}`. When you submit a temporary version to the graduate school, do not modify it. When you submit a final version, use `\documentclass[final]{oist_thesis}` instead.

Let's go through each section and comment them briefly. The last section will emphasize the differences between options `\documentclass[temporary]{oist_thesis}` and `\documentclass[final]{oist_thesis}`.

2.2.1 REQUIRED PACKAGES AND CONFIGURATIONS

This section contains the minimum number of packages and definitions to compile the thesis. No line should be removed or modified.

2.2.2 ADD YOUR PACKAGES

Add you packages in this section. In general, try to include as little packages as possible, as some of them can interfere and break each other.

2.2.3 ADD YOUR DEFINITIONS AND COMMANDS

Optionally, add custom definitions in this section. You don't have to keep the examples that come with the template.

2.2.4 PICK YOUR BIBLIOGRAPHY STYLE

Pick the bibliography style the most adapted to your field within the `natbib` package.

2.2.5 FOR THESIS BY PUBLICATION ONLY

There are two sections by that name, which are meant for students publishing a thesis by publication only. If you are not publishing a thesis by publication, please remove the sections.

The `multibib` package allows more than one list of references, but extra ones need to be given a name, the `Pub` in `\newcites{Pub}{List of Publications}`. With this, you may use new commands like `\bibliographystylePub` or `\citePub`. Please update the list of your publications in `Preamble/Thesis_publications.bib`.

2.2.6 TITLE PAGE

Creates the title page. Do not modify.

2.2.7 PREAMBLE PAGES

Structures the style (header) for the preamble pages and builds them. Do not modify, except for deleting the optional preambles you might not want to include.

2.2.8 LIST OF CONTENTS/FIGURES/TABLES

Creates the different lists. Do not modify.

2.2.9 THESIS MAIN TEXT

Structures the style for the main text chapters and builds them.

The command `\numberedchapter` is only relevant for a transition between unnumbered sections and numbered sections, it does not need to be included between each chapter.

2.2.10 BIBLIOGRAPHY

Includes the bibliography.

2.2.11 APPENDICES

Structures the style for the appendices and builds them. The appendices are numbered with letters but are structured like regular chapters.

2.2.12 Differences between temporary version and final version

There is only one difference between `\documentclass[temporary]{oist_thesis}` and `\documentclass[final]{oist_thesis}`: the line spacing is different. This might

create small issues, such as page breaking with large tables, images or captions, when compiling the same content.

Chapter 3

Figures, tables and images

3.1 Figures

Refer to figure like this: Figure 3.1 or this (Fig. 3.1). If you want to include a list of figure, you can use a short version of the caption as shown in Figure 3.1.

3.2 Tables

Refer to tables this this: Table 3.1.

Figure 3.1: Short caption (if wanted). Full caption with all the details here.

This secret image won't be numbered and won't appear in the List of Figures because of the *

Table 3.1: Short heading for the List of Tables.

Parameter	Value
Δ	0, 150
α	85
ϵ	6
κ	6.8
γ	0.2

Full caption with all the details here.

Parameter	Value
Δ	0, 1500
α	850
ϵ	60
κ	68
γ	2

This secret table won't be numbered and won't appear in the List of Figures because of the *

Conclusion

This is the conclusion. You might want to leave it unnumbered, as it is now. If you want to number it, treat it like any other chapter.
